

Partnership healthcheck

USE

To review the 'health' of the partnership, determining areas for discussion and improvement

PARTNERING PHASE

Implementation

Monitoring the health and efficiency of the partnership's setup, operation and processes, ensuring the building blocks of partnerships are in place, is essential to optimise partnership impact.

Parts of the framework can be used informally and regularly – for example every few months – as a prompt for discussion in partner meetings to help keep the partnership on track.

Below is the description for a more formal review workshop that could be held every six months or annually. Where there are many partners, or where there are significant issues raised, an external facilitator should be used.

1

Review workshop: preparation

Ask all partners to complete the checklist below, providing their opinion on where the partnership sits relative to each aspect of good practice in partnering: Green – no concerns; Amber – some concerns; Red – serious concern

Analyse the results to prioritise the areas for discussion at the workshop.

2

At the review workshop

Agree 'ground rules' to encourage openness and participation, making it clear that the review is not about judgment or blame, but a positive opportunity to bring up issues, learn together and improve the partnership;

Present the checklist analysis, jointly talk through each partnering aspect and the positive experiences or the challenges partners may have around it;

Aim to fully understand and appreciate your cross-organisational perspectives or other sources of diversity;

Talk through how each aspect of partnering could be either further enhanced or meaningfully improved to the satisfaction of all partners, and prioritize;

Determine what actions should be undertaken, by whom (wherever possible by more than one partner) and by when.

3

Post review workshop

Undertake the agreed actions, conferring with partners, keeping all informed on progress;

Confirm with partners that the aspects have improved.
